Business Summary

Stanek Tool specializes in close tolerance machined parts, precision inspection gages and complex mechanical assemblies for the Aerospace, Defense and Nuclear Security markets. We have been in business since 1924 and we have long standing relationships built with our customers due to our high quality and always putting our customers first. We are always investing in new equipment and standards to ensure optimal customer experience.

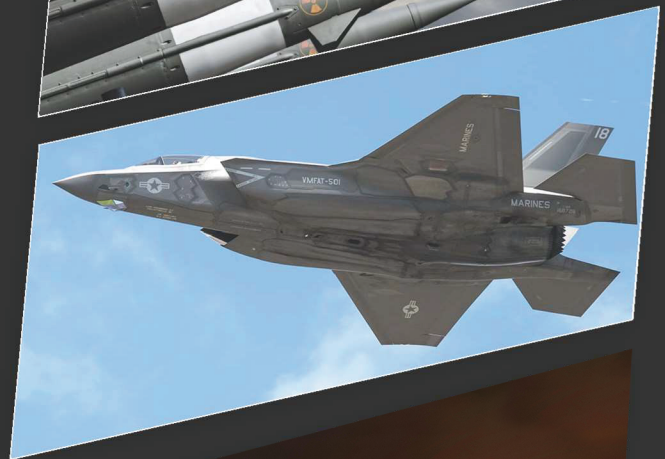

Capabilities

We are experts at tight tolerancing and GD&T. We have a strong technical expertise from sales to delivery. We have in house complex assembly and welding capabilities. We have strong project management abilities and you will have a single direct contact to make sure you are aware of everything throughout your program.

Facilities and Equipment

Our facility is in New Berlin, WI and we have a brand new 5 Axis machine, the second machine with that capability in house. We have the following machines in house and have a max size of 80"x100".
